EDUCATION

Central Connecticut State University - New Britain, CT — *Expected May 2027*
Master of Science, Computer Information Technology (4+1 Program) — ***Overall GPA: 3.71***

Central Connecticut State University - New Britain, CT — ***August 2023 – December 2025***
Bachelor of Science, Computer Engineering Technology — ***Overall GPA: 3.44***

- Club Involvement: Vice President of I.E.E.E, A.S.O Club
- Societies: National Society of Black Engineers, ColorStack
- FactSet Student Ambassador

SKILLS & CERTIFICATIONS

Software: Microsoft Office, Google products, Multisim, SOLIDWORKS, C, C++, Python, Cursor AI, Docker (basic), Raspberry Pi, AWS, Terraform, Jenkins, Harness, GitHub Actions

Engineering: Electronic Circuit Prototyping, Soldering, Blueprint Reading, Circuit Analysis, 3D Modeling, 2D Drafting & Drawings, Assembly Design, Prompt Engineering

Hardware: Windows OS, Linux OS, Printer Management, ConnectWise Automate, ConnectWise Manage

Lab: Research and Design/Development, Integrative Workflow, Data Analysis, Good Laboratory Practice (GLP)

Leadership: Team Leadership, Project Oversight, Social Networking, Quality Control

Certifications: *BioLaunch Laboratory Operations* 02/2024 | *SolidWorks Associate* 03/2021 | *OSHA-10* 03/2019

WORK EXPERIENCE

T&O LDP Associate – Platform/DevOps Engineer
The Hartford Insurance – Hartford, CT — **January 2026 – Present**

Delivered engineering work across 21 repositories (214 pull requests authored, 144 merged, as of November 2026) for ATLAS, a shared developer platform used by 4,000+ Hartford engineers (platform figure, November 2026), spanning developer experience, CI/CD automation, cloud workflows, and internal tools.

Built Atlas Studio, a developer-tooling pipeline that turns guide content into narrated 4K/8K walkthrough videos, with automated production and adaptive audio for developer education and onboarding.

Leading the implementation of browser-based Guides (side project): interactive, step-by-step guides that help engineers learn workflows and complete setup as part of self-service onboarding.

Engineered and hardened Harness project provisioning and onboarding, including rerunnable project creation, smoke testing, access configuration, and service-account reconciliation.

Led a zero-downtime, dual-write DynamoDB key migration across the DevOps Intelligence API and data ingestion; also shipped pipeline-query and guide deep-link capabilities.

Improved reliability across developer tooling through cross-platform integration tests, VS Code updater and release-workflow improvements, and an at-least 80% code-coverage threshold for extension development.

Led technical onboarding and knowledge transfer, supported LDP mentorship and orientation, mentored associates and interns, and contributed to university engagement.

Cloud and Reliability Engineering Intern
The Hartford Insurance – Hartford, CT — ***May 2025 – August 2025***

- Provisioned cloud infrastructure with Terraform; ensured compliance with AWS IAM and security protocols
- Developed and deployed a responsive Angular UI integrated with AWS Bedrock for real-time chatbot interactions
- Led prompt engineering and modular pipeline design for processing unstructured internal documentation
- Deployed agentic workflows for autonomous information retrieval, reducing queries by 80% across 800+ engineers
- Engineered a GenAI-powered document chatbot using Claude 3.5 Sonnet and Bedrock, integrating AWS ECS, Lambda, and S3 to support a Retrieval-Augmented Generation (RAG) workflow

Client Experience Associate
The Computer Company – Cromwell, CT ***February 2024 – March 2024***

- Managed PC imaging and Service Board tickets, ensuring efficient IT operations.
- Implemented cybersecurity measures based on ***Bitdefender*** recommendations.
- Utilized ***Cisco Meraki Portal*** for network management and optimization.
- Monitored and troubleshooted alerts from various devices, ensuring minimal downtime.
- Upgraded software on devices to enhance security and system integrity.
- Leveraged ConnectWise Automate and ConnectWise Manage for streamlined IT operations.

Information Technology Student Technician
Gateway IT Department - New Haven, CT ***October 2022 - May 2023***

- Collaborated with IT professionals to repair a script malfunction that affected **36,000+** students and faculty across 12 Community Colleges
- Troubleshooted technical issues in a virtual environment that allowed users more efficient access to their data
- Installed and configured hardware, software, and networks around campus as well as updating necessary software such as: ***Bomgar***, ***Windows O.S.***, ***Mac O.S.***, ***Microsoft Azure***, and ***Active Directory***
- Contributed to team effort by regularly doing printer maintenance and management

LEADERSHIP, MENTORING & COMMUNITY

Institute of Electrical and Electronics Engineering (I.E.E.E) – *Vice President* ***July 2023 – April 2024***

- Recruited approximately 40 new members during the CCSU involvement fair.
- Overhauled the Discord Server by introducing bots and channels for improved information organization.
- Spearheaded initiatives to establish partnerships with leading Financial Technology, and insurance companies (**FactSet, COCC, The Hartford, Travelers**) for diversity-focused hiring events.

NAAIA Greater Hartford Chapter – *Committee Member* ***May 2026 – Present***

- Serves on the Programs, Career Expo, College & University Outreach, and SHINE committees.
- Plans professional-development events and an early-career expo, and reaches out to local universities to support student career readiness.

Central Connecticut State University – *Student Team Mentor*

- Joins weekly sprint reviews with student software teams and guides them on cloud, DevOps, and agile practices.

FIRST Robotics (Hartford) – *Event Volunteer*

- Handled event setup and field resetting for a youth robotics competition.
